

We specialise in IT Service Consulting

Service Integration and Management.

We work with customers to understand and form their **SIAM** goals. Providing independent assessments and pragmatic solutions to mature and develop SIAM practices; either completing transformational delivery or acting as a critical friend on your SIAM journey.

What you get:

- IT sourcing strategy assessment and roadmap
- Current and future Model of Operation (CMO & FMO)
- Contractual requirements (SIAM elements)
- Enterprise demand to delivery process design
- IT Tooling design, procurement and implementation
- Programme planning, governance and implementation
- Programme governance and reporting
- Transition management
- Capability implementation and assurance
- Regular collaborative audits and assurance

How it will help you:

- Maximise business value from cloud and SIAM supply chain
- Support increase of efficiency and reduce operational costs
- Increased customer satisfaction scores
- Transparent service delivery throughout the SIAM structure
- Achieving and maintaining a flexible value-for-money SIAM model
- Accelerated assessment, design, planning and delivery
- Increased service availability
- Implementation of a fit-for-purpose operating model not a target
- Creation of a collaborative culture throughout the SIAM ecosystem
