

We specialise in IT Service Consulting

IT Transformation.

We recognise that an **IT Transformation** requires significant shifts in how your organisation currently operates. We can support the changes to service, technology, capabilities and organisation; enabling your strategic goals. We provide the specialism and experience to work alongside your organisation from strategy development through to successful delivery.

What you get:

- Strategic review, vision and strategy formation
- Transformations that include service, technology (Digital\Cloud) or organisation
- Current Operating Model (COM) assessment
- Target Operating Model (TOM) design
- Service and technology roadmaps
- Financial planning and modelling
- Enterprise Architecture
- Organisational design/transition (TUPE), coaching and mentoring, staff development plans
- Programme planning, governance and reporting
- Transition management and assurance

How it will help you:

- Transformation that delivers significant change to realise your vision
- Managed and assured transition that meets the required quality
- Effective strategies formed
- Effective programme delivery realising transformational outcomes (time, cost, quality)
- Organisation is fully engaged with transformation and its outcomes
- Proven consultants with a minimum of 10 years' experience
